

Investigating Habitat Association of Breeding Birds Using Public Domain Satellite Imagery and Land Cover Data

A Case of the Corn Bunting *Miliaria calandra* in Spain

by

Abdulkhakim Mohamed Abdi

Thesis presented to Universität Münster in partial fulfillment of the
requirements for the degree of Master of Science in Geospatial Technologies

Münster, North Rhine-Westphalia, Germany

Supervisor

Prof. Dr. Edzer Pebesma
Institute for Geoinformatics
University of Muenster

Co-supervisors

Prof. Dr. Pedro Cabral
Higher Institute of Statistics and Information Management
New University of Lisbon

Prof. Dr. Mario Caetano
Higher Institute of Statistics and Information Management
New University of Lisbon
Portuguese Geographic Institute

Prof. Dr. Filiberto Pla
Department of Computer Languages and Systems
University of Jaume I

Table of Contents

AUTHOR'S DECLARATION.....	ii
Abstract.....	iii
Acknowledgements	iv
Dedication	v
List of Figures.....	vi
List of Tables.....	vii
List of Acronyms.....	viii
Chapter 1 Introduction.....	1
1.1 Background and significance	1
1.1.1 The decline of farmland breeding birds in Europe.....	1
1.1.2 The Corn Bunting <i>Miliaria (Emberiza) calandra</i>	3
1.2 Species distribution modeling	4
1.3 Statement of problem.....	6
1.4 Study area	7
1.5 Research objectives.....	7
1.6 Research questions	8
1.7 Thesis organization.....	8
Chapter 2 Data.....	10
2.1 Satellite imagery	10
2.2 Satellite imagery preprocessing	11
2.2.1 Texture analysis	11
2.2.2 Calculation of vegetation indices	11
2.2.3 Tasseled cap transformation	13
2.2.4 Land surface temperature	14
2.2.5 Topographic variables	16
2.3 Land cover data	17
2.4 Land cover data preprocessing.....	17
2.4.1 Anthropogenic variables	17
2.4.2 Landscape metrics	19

2.5 Catalan breeding bird atlas	20
2.6 Analysis tools.....	22
Chapter 3 Methodology	23
3.1 Bivariate descriptive statistics	23
3.2 Multiple logistic regression	23
3.3 Multicollinearity diagnosis	24
3.4 Variable selection	25
3.5 Assessing goodness of fit and model validation	26
3.6 Model evaluation and selection	28
Chapter 4 Results	29
4.1 Overlay analysis	29
4.2 Bivariate descriptive statistics	30
4.3 Satellite model	31
4.4 Land cover model	33
4.5 Combined model.....	35
4.6 Model selection.....	37
Chapter 5 Discussion	38
5.1 Satellite imagery	38
5.2 Land cover dataset	39
5.2.1 Non-irrigated arable land	39
5.2.2 Permanently irrigated land.....	39
5.3 Final model	40
5.4 Variable selection	41
5.5 Comparison to the CBBA map	41
Chapter 6 Conclusions and Recommendations.....	43
References.....	46
Appendix A : Anthropogenic variables	52
Appendix B : Descriptive statistics.....	54
Appendix C : Statistical analysis.....	59
Appendix D : R Code.....	63
